

Updated 8/2019

Parent Command Center

The online way to check on your child's grades and other information concerning school related activities.

If you have access to the Internet and are interested in creating a parent login, please carefully look over the steps provided. This is not something that just anyone has the ability to access. You must following the steps below to be successful in entering the information needed to begin viewing your child's grades.

To be a new user, your information **MUST** match the information stored in the JPAMS program. This information includes the last 5 digits of the student's social security number.

Please follow these steps:

1. Go online to <http://www.gpsb.org>
2. Find the **PARENT COMMAND CENTER** link found in the middle of the page
3. Click on Register – New User. Fill in the fields in red
 - Relationship
 - Last Name
 - PSN – last 5 digits of student's social security number
 - Street Address
 - Submit.
4. If your student's information matches your parental information, you will be directed to create a user name and password. Write the information down and always keep your username and password in a safe location.

**If you have more than one child in the Grant Parish school system, you will use the last five digits of the parent's SSN. This should link all the students together under one account.

Problems:

1. Contact Mrs. Susan or Mrs. Hyde at GJH to check if the information for the student matches the information in JPAMS.
